

# Endoscopic Services, P.A.

## **ADVANCE DIRECTIVES**

What are they?

They are documents that are prepared in advance, that give specific instructions about a patient's medical care should they develop a terminal illness or life threatening injury. Examples: A Living Will or Durable Power of Attorney for Health Care. An additional pamphlet is available upon request.

In the unlikely event that a life-threatening emergency develops, it is our policy to provide emergency measures and advance directives would be carried out upon admission to a hospital.
